Class Descriptions

Email Basics

Learn what email is, how it works, and how to stay safe while using it. Bring your smartphone and email login credentials to practice with during the class! If you don't already have an email account, our teachers can help you sign up for one.

Extra, Extra! Get Your News Online!

Learn how to access local and national news from reputable online sources. We'll teach you how to search for news online, which apps you can download on your phone, and how to set up personalized news settings.

Facebook for Beginners

Learn how to post, comment, and react to posts with your Facebook account. You'll also get tips on how to stay safe and secure while using Facebook. Bring your laptop or smartphone and Facebook login credentials to practice with during the class! If you don't already have a Facebook account, our teachers can help you sign up for one.

Fun With Photos: How to Save, Share, and Edit Photos With Your Smartphone

Learn how to manage photos on your smartphone, including how to upload photos to social media, send pictures to friends and family, and save and edit your photos. Bring your smartphone with you for some hands-on practice.

How Does Technology Affect Your Health?

Does technology affect your health? Learn about the effects of certain types of technologies on your physical and mental health, whether everyday technology is safe to use, and how to stay healthy while using technology. We'll cover concerns about Wi-Fi, 5G, social media, and news and offer practical tips to stay healthy in our modern world!

How the Heck Does This Thing Work? Computers 101

Learn the basics of how to use a computer and how to navigate to different programs on your computer. We'll teach you how to hold and move a mouse, how to point and click, how to use your keyboard, how to use a trackpad, and more basics. Bring your laptop with you if you have one for more hands-on practice!

How the Heck Does Wi-Fi Work?

Learn the basics of how wireless internet works, what a wireless network is, and how a wireless network is created. We'll share the difference between home and public Wi-Fi, and we'll offer tips for you to get a better Wi-Fi connection.

How to Shop Safely Online

Learn how to shop online while keeping your information safe. We'll offer a brief overview of how to shop online, with a focus of how to stay safe while making online purchases. Regardless of the websites you use to shop online, learn what red flags to look for and how to avoid scams.

How to Video Chat

Learn how to use and navigate video chat platforms like Zoom, FaceTime, and Google+, on your phone, computer, or tablet! We'll cover basic steps, how to manage video chats, and more. Bring your smartphone or laptop for hands-on practice!

Internet Safety

Learn how to stay safe while using the internet. We'll cover password management, how to increase your safety while browsing the internet, how to keep your privacy secure on social media, and more. We'll also explain cookies, spam, phishing, and antivirus protection.

Intro to Bug Tussel

Learn about Bug Tussel Wireless. We'll give an overview of the history of our company, our services, and Bug Tussel University, our educational department.

Keep Your Tech Appy: How to Install and Uninstall Apps

Do you have an app or a program on your computer or phone that you want to remove? Is there a new app or program that you want to install, but you aren't sure how? Learn how to install and uninstall apps on your phone, computer, and tablet. Bring your smartphone, tablet, or laptop for hands-on practice!

Remove the Hassle From Passwords

Managing passwords can be such a hassle! In this class, we'll teach you how to manage your passwords safely and securely. We'll cover why you need so many passwords, how to remember them when you need them, and best practices for updating your passwords safely and securely! Bring your smartphone or laptop for hands-on practice!

Search Smarter: Improve Your Internet Searching Skills

Get tips on how to improve your internet searches. We'll offer suggestions on how to find information online and give hands-on opportunities for you to practice your searching skills. Bring your smartphone or laptop for hands-on practice!

Smartphone Basics

Did you know that your smartphone has GPS, SIM card, and Bluetooth capabilities? Not only do smartphones allow you to make calls and send texts, but they also allow you to send and receive emails, browse the web, download apps, and organize your personal life! Learn how to take advantage of these many useful features and what your smartphone can do for you. Android and iPhone users are welcome. Bring your smartphone for hands-on practice!

Snapchat For Beginners

Learn the basics of how to use your Snapchat account including signing up, posting, sending snaps, and using filters. You'll also learn tips on keeping your information private and secure. Bring your smartphone and Snapchat login credentials to practice with during the class! If you don't already have a Snapchat account, our teachers can help you sign up for one.

Stop Reading CRAAP: How to Spot Unreliable Information Online

Learn how to spot when information you find online isn't true! We'll teach you how to use the CRAAP test to evaluate whether the information you are reading is credible and reliable! You'll learn how to spot common tricks that many websites and content creators use to give you misleading or false information.

Stream On: How to Watch Movies and TV Shows Online

Learn how to stream movies and TV shows online, how to choose a streaming service, and how to download or watch programs on your phone or computer. Bring your smartphone, tablet, or laptop for hands-on practice!

Tech Help

Have tech questions? Drop in any time during this session to get one-on-one help with your questions about computers, the internet, email, social media, your device, or other technology. If you have a question about a device such as a smartphone, tablet, or laptop, bring it with you! We can help with any basic tech questions and will always give our best effort at answering more advanced questions as well! Help will be provided on a first-come, first-served basis.

Using the Internet to Keep Your Brain Healthy

Learn how you can use the internet to keep your brain healthy. We'll give tips on activities you can do online to learn new things, stay socially engaged, keep active, minimize stress, and more.

Virtual Doctor Visits: Learn How to Visit Your Doctor Online

Learn what telemedicine is and how you can visit your doctor online. We'll teach you how to use your phone, computer, or tablet to see your doctor without leaving your home. You'll also learn how to access your e-chart, pay your bills, and schedule appointments. Bring your smartphone, tablet, or laptop for hands-on practice!

What the Heck is a Podcast? Free On-Demand Radio

Do you like listening to the radio? Do you have a favorite program you tune into every week? Podcasts are like radio programs on-demand! Learn how to choose topics and radio hosts that interest you. We will teach you how to access podcasts on your laptop, tablet, and phone. Bring your smartphone, tablet, or laptop for hands-on practice!

What the Heck is Fiber Internet?

Learn what fiber internet is, why it's different from Wi-Fi, how it works, and what it means for you and your internet connection. You'll learn about fiber cables, why fiber is being buried in your neighborhood, and more!

Why the Heck Can't I Get Internet?

Do you ever wonder why you are unable to receive internet in your area from different providers? Learn the reasons some internet service providers can't reach some areas, including the "last mile" cost factor, new vs old infrastructure, and alternatives to fiber internet.
